Experience &Training

○ Wide Space Company I jawlat althaqafa, Sana'a
Phone Numer: +967773030069

PHP/Laravel

During my tenure, I played a key role in developing a wide space website, ensuring its dynamism through an intuitive dashboard interface. I implemented multi-language support for both Arabic (AR) and English (EN) users, enhancing accessibility. Additionally, I built a vibrant blog website using WordPress, harnessing its versatility. Moreover, I acquired proficiency in Filament PHP, adding another layer of expertise to my skill set. Furthermore, I received specialized training in API integration, empowering me to enhance website functionality and connectivity.

○ Technology Stars Company I Zubayri Street, Sana'a

Phone Number: +967778020180

Trained on Hospital ERP System

I received comprehensive training and hands-on experience working with a hospital ERP system, encompassing modules such as Human Resources Management System (HRMS), Medical Facilities Management System (MFMS), Financial Resources Management System (FRMS), and Roles Management System. During this training, I gained practical knowledge in utilizing and navigating the various functionalities of the ERP system to effectively manage human resources, medical facilities, financial resources, and roles within a hospital setting. This experience equipped me with valuable insights into optimizing operational processes and ensuring seamless management within healthcare institutions

SKILLS

- PHP
- HTMI & CSS
- C#
- WordPress (basics)
- RESTful API (basics)
- GitHub and GIT

Databases

- MySQL
- SQL Server

Networking

- CCNA Network
- MCSA: Windows Server (basics)

Projects

○ PHP / Laravel

A web-based system for the Higher Education Division in FCIT Faculty - Sana'a

Developed a web-based system catering to the needs of the Higher Education Division within the FCIT Faculty at Sana'a University. This project encompasses functionalities such as student registration, academic information management, research paper storage, term schedule creation, and notification alerts. Demonstrates expertise in developing tailored solutions for educational institutions, enhancing administrative processes and facilitating effective communication.

GitHub: **Private**

○ PHP / Laravel

Real Estate

Developed a comprehensive real estate platform using Laravel, featuring separate dashboards for administrators, agents, and clients. Leveraged Laravel's robust capabilities to create a dynamic and user-friendly environment for property listings, transactions, and communication. Demonstrates proficiency in utilizing Laravel to meet the unique requirements of the real estate industry, facilitating seamless interaction between stakeholders.
